Surface Mounted Light Installation Instructions

1 Pull the AC cable out of the ceiling plate. Adjusting the ceiling plate to a suitable position, drill the mounting holes and use screws to fix the plate

2 Align the slot of the lamp body with the tenon of the lamp housing, and secure it clockwise into the lamp housing.

3 Connect the fixture to the AC power supply. Insert the fixture in the ceiling plate and twist, making sure the lugs engage fully in the latching slots.

4 Restore the power supply.
